

IN THE SPECIFICATION:

Please amend the paragraph beginning at line 15 of page 16 as follows:

An offset-amount setting mode is specified in an offset-amount setting selection item 501. More specifically, here the user specifies whether to display a print preview using an offset amount decided based upon a print setting stored by the print setting means 305 (this is an automatic mode, which is specified if "AUTOMATIC" has been selected), or to display a print preview using an offset amount specified by the user (this is a manual mode, which is specified if "MANUAL ADJUSTMENT" has been selected). What the user specifies is stored by the management means 309 in memory or on the hard disk 205 together with the offset amount.
